

Data Flow Diagram

Date	28 June 2026
Team ID	
Project Name	A comprehensive measure of well being
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., Customer Database, Inventory).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Project DFD (Level 0): HDI Prediction System

The diagram below shows how country indicator data flows through the HDI prediction system, from user input to the stored prediction and generated report.

Flow summary: the researcher submits country indicators, the system validates and stores them, computes the Health / Education / Income sub-indices and overall HDI score, logs the result to the prediction history store, classifies the development tier, and returns a downloadable report.
