

Problem-Solution Fit

Date	29 June 2026
Team ID	
Project Name	A comprehensive measure of well being
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. CUSTOMER SEGMENT(S) [CS] - Development economists / policy researchers - NGO workers tracking global development trends	6. CUSTOMER LIMITATIONS (Budget, Devices) [CL] - Limited budget for paid analytics/BI tools - Access mainly via office desktops/laptops, not specialized software	5. AVAILABLE SOLUTIONS (Pros & Cons) [AS] - UNDP HDR website - authoritative but static, no what-if prediction - Manual Excel calculation flexible but slow and error-prone
2. PROBLEMS / PAINS planning agencies + Frequency [PR] - Manual HDI calculation is slow and error-prone (every analysis cycle) - No visibility into which sub-index is weakest (recurring)	9. PROBLEM ROOT / CAUSE Variable internet connectivity in field offices [RC] - Raw indicator tables from UNDP/World Bank are not pre-classified into HDI tiers - No lightweight, purpose-built tool bridges raw data and an instant, explainable HDI prediction.	7. BEHAVIOR + Intensity [BE] - but not HDI-specific Downloads indicator CSVs and cross-checks values manually (high effort, weekly) - Re-computes scores by hand for each country of interest (high intensity)
3. TRIGGERS TO ACT [TR] Comparing many countries by hand is tedious (frequent, each new UNDP/World Bank data report) release - An upcoming policy report or funding proposal deadline - A request to compare several countries quickly	10. YOUR SOLUTION [SL] A web application where users enter or upload country indicators (life expectancy, schooling, GNI per capita); an ML model instantly computes the Health / Education / Income sub-indices, predicts the newsletters	8. CHANNELS OF BEHAVIOR [CH] ONLINE - UNDP / World Bank open data portals - Research forums and policy newsletters OFFLINE - Conferences and policy workshops - Internal government/NGO briefings
4. EMOTIONS BEFORE / AFTER [EM] Before: frustrated, time-pressured, uncertain about accuracy		

After : confident, reassured, able to act quickly on clear results
